

Kick-IT

Cash Drawer Interface
Converts Serial to RJ11 CDKO

CDKO Cash Drawers now available for *all* POS Systems

The Problem: My POS application requires a cash drawer with a serial interface.
Special drawers like *Indiana cash drawers* cost too much, and take too long to get.

The Solution: **Kick-IT**, the serial interface for any CDKO, off-the-shelf Cash Drawer!
Why wait months to get "special" cash drawers manufactured?

*Tired of expensive, long lead time,
hard to get serial cash drawers?*

The Kick-IT allows any POS system to use any CDKO cash drawers

Works with any POS application that requires a Serial based Cash Drawer

All connections lock in place

For applications that do not have the ability to use OPOS

No software drivers required

Designed for DOS, Unix or Windows

Intelligent interface
- **NO** programming required
- **NO** switches to set

The Kick-IT is Easy to Implement

- Connect the CDKO Cash Drawer to the Kick-IT
- Connect the Kick-IT to the serial cable
- Connect the serial cable to the POS terminal
- Flexible power options:
 - 24 Volt powered USB
 - or
 - 24 volt POS printer power supply

Start Saving Money Today!

- CDKO cash drawers cost less
- CDKO till trays cost less
- Save \$\$ on the purchase over others' serial based drawers
- Save on yearly maintenance

Used in the world's largest casual dining restaurant chain.
They saved money, so can you!
